

FEATURES	BENEFITS
Large stainless steel coin tray mounted ergonomically on the machine	Easier operation no lifting to higher aperture on machine. Easier to inspect coins prior to going into machine
Flip- down boxes ideally suited to small plastic bank bags	Both hands free during operation of changing bags
Non – stop bagging feature	Allows other coins to be counted whilst full bag is being changed, considerably improves throughput of this type of machine, no down time
Excellent and dud coin recognition	Improved accuracy when check/ weighed. (If weight incorrect, bank sends ‘inaccurate bank deposit’ slip to customer)
Foreign coins go into separate outlet	Easy removal of foreign coins out of circulation
Suspend count mode	User can quickly count a bag of coins without disrupting their totals
Accumulative/ sub-total	Sub total, daily total and weekly totals
Manual note entry	Note values can be manually entered into the print out
Meter number, location number and operator number functions	Attribute identity to where a transaction originated

Set till float function	Mixed coins can be counted, sorted and appropriate amounts ready for till drawer
Integral Printer (optional)	Neat Compact unit, no extra cables, less space used in cash office. Banking totals readily available
Cash Management Software (optional)	Customer can provide accounting information on their computer from counting equipment and other cash equipment. Total solution for cash office
Anti- bacterial finish	Ideal for hospitals
Stainless steel working parts	Easy cleaning, and durability
Robust steel enclosure	Robust for working in the harshest of environments
Low power consumption	Cheaper operational costs, environmentally friendly
ROHS compliant	Meets EU regulations
Desktop	For use in small areas
Wheeled stand (optional)	Can be moved for storage. Free standing for operation
Large plastic bag facility (special version available incorporating large plastic bag holders)	Ideal for medium turnover users, as used by some cash-in-transit companies
Large plastic bag version strategically positioned for easy changing of bags	User can change bags more easily
